Technology, infrastructure in focus as Cuban foreign minister visits China

29/05/2019

Cutting-edge technology, boosting tourism and building infrastructure for renewable energy are in focus during the Cuban foreign affairs minister's ongoing visit to China.

"Cuba celebrates the success of Chinese technology and the development of its top world-class companies, which it trusts completely," Bruno Rodríguez said on Wednesday in a joint statement with his Chinese counterpart Wang Yi, at a time when the United States has placed bans on Chinese tech giant Huawei.
