
Cuba Provided 99 million Medical Consultations in 2018, Minister Says

28/12/2018

Havana, Dec 28 (Prensa Latina) Medical consultations done in Cuba in 2018 amounted to 99 million, the head of the Ministry of Public Health (MINSAP) Jose Angel Portal said on Friday.

Of that total, 86.2 million consultations corresponded to primary care level, four million more than a year ago, Portal argued on his Twitter account.

That is preventive medicine that we are enhancing! In 2019 #VamosPorMas, he added in the message.

Also on the same social network, MINSAP reported that Minister Portal headed this Friday the last meeting of the year with the provincial directors of health.

The fundamental axis of the debate is the analysis of essential issues for the development of Public Health towards 2019, the tweet adds.
