Books about Cuba and United States relations to be presented at UNEAC

09/10/2014

It will be also presented the extended second edition of *De la confrontación a los intentos de “normalización”. La política de los Estados Unidos hacia Cuba* (Editorial de Ciencias Sociales, 2014), from Cuban authors Elier Ramírez Cañedo and Esteban Morales Domínguez.

Both texts approach, from the authors view point, a less explored aspect in previous studies about the United States-Cuba conflict: the moments of negotiation, approaches or dialogues between the authorities of either countries or what could be called the history of the secret diplomacy that has coexisted for more than 50 years together to the well known bilateral disputes.

The moderator will be Ramón Sánchez Parodi, who was chief of Havana Section of Interests to Washington and participant in some of those events.

Translation: Liana Fleitas (Cubarte)
