
Unstoppable Genocide in Gaza

15/08/2025

Unworthy of any circus, no matter how mediocre, is the "act" staged by the clownish American president, Donald Trump, against the genocidal Israeli prime minister, Benjamin Netanyahu, upon supposedly learning that Palestinian children are dying of hunger in Gaza, a fact that the criminal prime minister had previously denied.

Of course, Trump "ignores" that many children are among those killed by the bullets he delivers to Israel when they go to areas where the aggressor had supposedly announced it would deliver food.

Nor is it known to the American president that his protégé has given the go-ahead for experienced snipers to kill as many children and women as possible, so that the children will not seek revenge when they grow up and the women will not be able to procreate, something we had already denounced in previous comments.

Now the Western media recognizes that the announced invasion by Israeli troops into the capital, Gaza City, will be atrocious and will cause great carnage, to expel all its residents and carry out a ground offensive. However, the Chief of Staff of the Israel Defense Forces, Eyal Zamir, has expressed his fear that the operation will endanger the lives of Israeli hostages. In a recent meeting, he told Netanyahu that he believed he was "falling into a trap."

However, this has delighted the most fanatical defenders of Zionism, including clerics who prefer the death of Palestinian children and like-minded individuals who have created a great number of psychopaths.

In this regard, a person unknown to me, Maximilian Steele, published a guide on how to form a perfect psychopath in Israel:

a) Take a child and tell him he belongs to an exceptional people: God's chosen people; b) Tell him that children from other peoples have "satanic souls" (as Rabbi Isaac Luria said of non-Jews); c) Tell the child that those of his people have the right to steal and kill those of other peoples (as the Talmud says). In short: Make him a Jew and/or an Israeli. With luck, you'll even get a guy like Rabbi Ely ben Dahan (Israeli war minister appointed by Netanyahu),

who claims: "Palestinians are subhuman, animals who don't deserve to live" and "the soul of a Jew, even a homosexual, is infinitely superior to that of a non-Jew."

VERIFICATION

According to several United Nations agencies and officials, According to NGOs and most genocide scholars, Israel is committing genocide in the Gaza Strip against Palestinians during the invasion and bombing as part of the ongoing war of aggression in Gaza.

The acts of genocide described include large-scale killings, the use of starvation as a weapon of war, the destruction of civilian infrastructure, attacks on health workers and aid seekers, and forced displacement.

The exact number of victims is unknown and increases daily, but it's estimated that Israel has killed more than 61,158 Palestinians in Gaza (2.9% of the country's total population, similar to the global death toll from World War II) and injured at least 151,442 people (7.21% of the population), destroyed more than 70,000 homes, and displaced 1.9 million people, accused of ethnic cleansing for the latter act.

The vast majority of victims are civilians, and more than half are women and children. The dead include about 1,151 health workers, 310 from UNRWA, 53 Red Crescent humanitarian workers, and 232 journalists.

Thousands more bodies lie under the rubble of destroyed buildings.

In addition to direct deaths from bombing and gunfire, Israeli action has been characterized by the systematic destruction of the Strip's health infrastructure, food resources, and cultural and educational heritage.

The Israeli blockade greatly contributed to the famine in the Strip, while Israeli forces destroyed humanitarian supplies sent to the Palestinian population.

Since the beginning of the conflict, Israel has cut off water and electricity supplies to the Strip and has been destroying all wastewater treatment plants and a large portion of water wells and desalination plants.

It has also destroyed several culturally important buildings, including 13 libraries, all 12 universities in Gaza and 80% of their schools, dozens of mosques, three churches, and two museums.

Israeli acts have been denounced as genocide by the governments of at least 32 countries, several United Nations agencies, and non-governmental organizations.

In the words of Israeli Omer Bartov, one of the most renowned historians of genocide, "the community of genocide scholars (...) is moving ever closer to a consensus around describing the events in Gaza as a genocide." Ugur Umit Ungor, another professor of genocide based in Amsterdam, asserts that there might be genocide scholars who do not consider what happened in Gaza as such, but "I don't know any."
