

Cuba now has 50 wi-fi hotspots

26/11/2015

Cuba now has 50 wi-fi hotspots HAVANA, Cuba, Nov 25 (acn) The Telecommunications Company of Cuba, ETECSA S.A by its Spanish acronym, opened from Tuesday another four WIFI areas for wireless Internet access, located in parks and urban areas of public high influx, Granma newspaper says.

The new areas are located in parks Rubén Bravo, in Holguin province; Calixto Garcia, in Granma province; and Monaco, in Havana; in addition to the Central and 14th pavilions of EXPOCUBA fairground in the capital.

With these new areas there are 50 WIFI public zones throughout the country and it is expected to create five others before the end of the year, and this will be communicated in due course.

For information and assistance on this path to the Internet, users can call to 118, commercial information service.
