Hacker Steals, Leaks Adele's Private Photos

21/03/2016

LONDON – British singer Adele has been the victim of internet hacking, which ended by leaking several private photos online, British daily tabloid the Sun reported on Sunday.

The images included ultrasound pictures of her son, other pictures for her as a child and photos for her dressed as Santa Claus early in her career.

The Sun said that the photos were stolen after a hacker managed to access the email of her partner, Simon Konecki.

Adele, 27, knew what happened when she found some of the stolen files on a Facebook group dedicated to her fans.
